CAREER SUMMARY

A web developer with two years of commercial experience building and maintaining web applications in various environments. Specializing in PHP development, SQL databases, experienced in both independent, ground-up projects and team-based work often utilizing popular CMS platforms. Looking for an opportunity to expand my knowledge and take on new challenges.

EXPERIENCE

October 2023 – present
Fabrykat.pl – **full-stack developer** (part-time)
- Engineered a content management system from the ground up using PHP and SQL, including custom backend logic and responsive front-end design.
- Worked on existing projects based on WordPress and Prestashop platforms, developing new features and maintaining existing solutions.
- Delivered many projects of varying complexity designed by external companies, including landing pages, applications dependent on external APIs and databases.

June 2024
Erasmus mobility – **game development, 2D and 3D graphics**
- Participated in a team project, responsible for implementing C#-based game mechanics in Unity engine
